#### PRESIDENT'S MESSAGE

Happy Fall Everyone. Halloween is in the air at Country Greens HOA and our weather is down in the high 80', still waiting for that chill!!!

We have no colorful leaves but the smell of pumpkin and spice is in the air. There are homes that are displaying Halloween decorations to set the mood for some fun and possibly a Halloween parade in CGHOA (MASKS & DISTANCING OF COURSE). Details will be forthcoming.

As most of you know from our recent ZOOM meeting, much has been successfully accomplished in the past month. A fining committee established & cases heard, storm drains cleaned, several trees removed, all hardwood trees trimmed, and a new pool heater ordered. It has been an extremely busy summer with the continued absence of the majority of the Board. We send continued prayers to Jeanne Grimaldi and Ron Petersdorf both who are greatly missed.

An update inspection of building & grounds has been done. Our building, gutters, sidewalks, and driveways are in need of cleaning, some gutters need replacing. Please do your due diligence, we do not want to have to send you a letter. Let us make our hidden GEM shine.

In addition, regarding any EXTERIOR modification of your units, an ACC form must be completed. "When in doubt fill it out". After completion put it in the HOA white mailbox in the front of the community mailboxes.

HAPPY HALLOWEEN, everyone.

Joanne Slocum, President jc371@comcast.net

# HURRICANE SEASON IS HERE BE PREPARED!

Inspect your home regularly.

Does your fence or driveway need to be repaired, pressure cleaned or painted? Are your gutters clean? Are your screens torn and is the roof look like it's in good repair. All issues need to be addressed prior to hurricane season and at the end of the rainy season.

By working together we make our community a home

Highlights by Bruce Brodsky and Debbie Murphy

Country Green Homeowners are responsible for the cleaning of debris from their gutters, general cleanliness of their gutters, sidewalks, driveways, and vinyl on the building.

Please inspect your building. If your driveway, walk, patio and/or fences need cleaning, contact Terry West, as Gianni Pressure in Paradise, will soon be in the community.

DON'T wait to get a violation letter as the ACC committee has begun inspection of the community and have found many issues. Many units are in need of gutter replacement, we do not normally recommend a vendor for this, however; have found someone who is licensed & insured who is very reliable, reasonable in price and local. Budget gutters offer seamless gutters ask for Samantha at 561-667-4571. You will be quite surprised at their quotes.

Kindly keep our hidden gem, pristine, and keep your units the best they can be.

#### **Mosquito Facts**

There are over 3,000 species of mosquito world-wide. They ALL depend on a source of water to complete their lifecycle.

Florida has the greatest variety of mosquitoes, more than 80 species.

#### Mosquito Life Cycle

During warm weather, eggs mature into adults in 7 days.

#### **EGG**

Depending on the species of mosquito, eggs can be laid in water on rafts containing 100 to 400 eggs or on damp ground where water will later cover them. Within a day or two, the eggs hatch into larvae.

#### **LARVA**

Referred to as "wrigglers", larva come to the water surface to breathe. They molt (shed skin) four times during the next several days, growing rapidly between each molt.

#### **PUPA**

In this stage, the mosquito grows inside the pupa, becoming fully developed within two days. Pupa cannot eat and breathes through tubes on its back.

#### **ADULT**

Newly emerged adults rest on the surface of the water until strong enough to fly away.

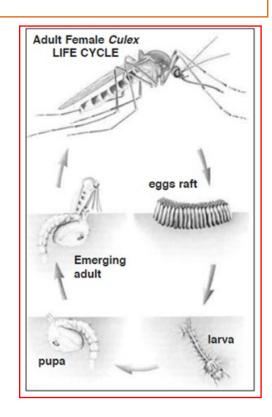

#### **Bromeliads - Did You Know?**

#### Popular in landscaping but

#### **MOSQUITOES LOVE THEM TOO!**

Certain types (like the one pictured) hold water in each of the leaf pockets. This is the perfect place for a female mosquito to lay eggs - loads of water that is shaded from the sun.

The most common mosquitoes found in bromeliads in Palm Beach County are Aedes aegypti and Aedes albopictus and can transmit Dengue, Chikungunya, Yellow Fever, and Zika.

Mosquito-borne diseases found in Florida include Zika West Nile virus disease, Eastern equine encephalitis, and St. Louis encephalitis. Many other mosquito-borne diseases are found in different parts of the world, and can be brought back to Florida if infected people or animals are bitten by mosquitoes while in Florida.

THE BEST WAY TO PREVENT CONTAINER
MOSQUITOES FROM BREEDING IS TO
REMOVE STANDING WATER IN
CONTAINERS AROUND YOUR PROPERTY

#### Things YOU Can Do

- Inspect your home weekly for any standing water including around hose facets and air conditioner drip lines
- Keep gutters clean
- Remove standing water in buckets, pots and other containers
- Remove bird baths
- Cover patio waterfalls when not in use and making sure that the cover will not collect standing water
- Treat bromeliads and other vegetation that hold water with products containing the bacteria Bacillus thuringiensis, var. israelensis.
- Repair screening on windows, doors, porches, and patios.

#### **MOSQUITO-PROOF YOUR BROMELIADS!**

Flush each leaf pocket with clean water every 3 to 4 days OR

Treat each leaf pocket with granular Bacillus thuringiensis israelensis found at most home improvement stores OR

Consider removing bromeliads and replacing with another tropical or native plant that does not hold water

## Please Don't Feed Bread To The Ducks & Geese

#### Why not?

Regular feeding of bread (especially white)/cakes/biscuits etc. can cause......

- Poor nutrition
- Spread of disease
- · Unnatural behaviour
- Water pollution
- Overcrowding
- Delayed migration
- Rats (encouraged by uneaten bread)
- Uneaten bread floating around doesn't look very nice!

#### What should they eat?

The bird's natural diet can feature......

- Grass
- o Plants from the lake
- Seeds & berries
- o Insects
- Shellfish
- Even small fish and frogs in some cases!

Specialist waterfowl feed or grains can be purchased from many pet shops, garden centres and online retailers.

Please help take care of ducks and geese by allowing them to enjoy their natural diet so we can enjoy seeing them for years to come!

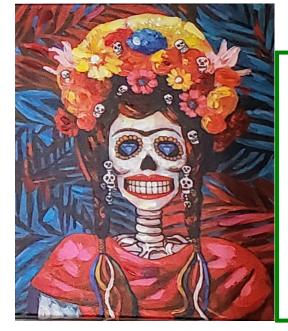

SAVE OUR WILDLIFE, DON'T FEED THEM
KEEP THEM HEALTHY & SAFE WITH FOOD NATURE PROVIDES

& REMEMBER
